Target Architecture

Deployment & Operations

```
[SUCCESS] Database is running
[SUCCESS] Backend API is responding
[SUCCESS] Frontend is responding
[SUCCESS] JobQuest Navigator is starting up!
```

Service URLs:

```
🌐 Frontend:      http://localhost:3002
🔗 API:          http://localhost:8000
🔑 Django Admin: http://localhost:8000/admin/
📄 API Documentation: http://localhost:8000/api/docs/
🗄 Database:     localhost:5432
🚀 Redis:       localhost:6379
```

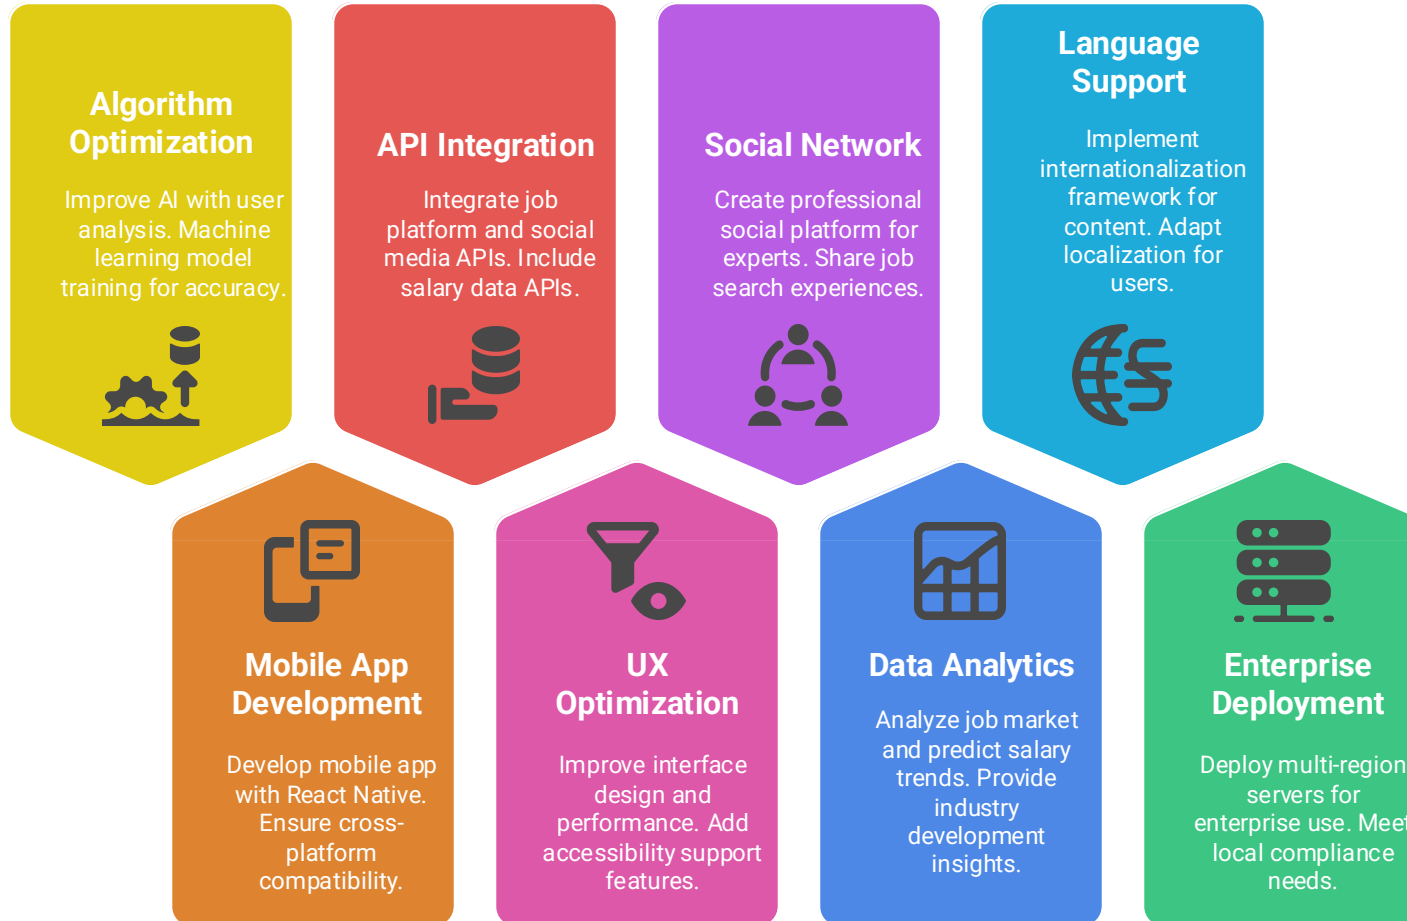

Optional Services (if enabled):

```
✉ MailHog:      http://localhost:8025
💾 MinIO:       http://localhost:9001
☁ LocalStack:  http://localhost:4566 (AWS services)
🔍 Elasticsearch: http://localhost:9200
📈 Prometheus:  http://localhost:9090
📊 Grafana:     http://localhost:3001 (admin/admin123)
```

Useful Commands:

```
📋 View logs:    docker-compose logs -f [service_name]
🔧 Run management: docker-compose exec backend python manage.py [command]
🔧 Access shell:  docker-compose exec backend bash
🛑 Stop services: docker-compose down
🗑 Clean up:      docker-compose down -v --remove-orphans
```
